7.	Section 7: Handling and storage			
7.1	Measures for safe manipulation:			
7.1.1	Recomendations:			
	a) Workers handeling the product have to get familiar with health and safety rules for work and have to obey these rules. Secure escape routs (enclosing of leaked mixture, sealing of demaged packages and so on), for fire prevention (remove ignition sources, non-sparkling tools and so			
	on) and limit the production of aerosol and dust.			
	b) Obey measures for prevention of manipulation with incompatible substances or mixtures (see part 10) in common areas.			
	c) Store in original closed packages in temperature from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources.			
	d) Prevent the contamination of environment, i.e. leak into canalization, se	urface or underground water and soil.		
7.1.2	Instructions for general hygiene of work:			
	a) Do not eat, drink or smoke on work areas.			
	b) After working with product wash your hands with soap and water, even	tualy use regeneration hand cream.		
	c) Before entering dining areas, remove contaminated clothing and protect	ctive equipment.		
7.2	Conditions for safe storage of substances and mixtures including incompatible substances and mixtures: Store in dry and well-ventilated storages in original closed packages in temperatures from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources. Prevent any contact with oxidazing substances, strong acids and bases. Do not store with food, drinks and feed. The product is not a flamable liquid according to ČSN 65 0201.			
7.3	Specific end use: see part 1.2; coating procedure and recomendations are documentation.	e listed in technical list of the product, or in other product

	Section 13: Disposal considerations		
13.1	Methods of waste management:		
1	a) Appropriate methods of substance, mixture and contaminated packaging disposal: Product remnants and packaging with product remnants		
	must be incinerated in a hazardous waste incinerator or kept at a hazardous waste landfill. b) Physical / chemical properties that can affect means of waste handling: Liquid mixture is completely miscible with water.		
	c) Avoidance of disposal through sewer: It is necessary to	o prevent leakage of both components and hardened mixture into drains.	
	d) Special precautions for the recommended waste mana	agement: Avoid contact with skin and eyes.

Guidelines for training:

As required by national legislation.

Recommended restrictions on use (i. e. non-statutory recommendations by supplier):

Product should not be used for other purposes than specified (see section 1.2). Because specific conditions of use are beyond supplier's control it is responsibility of the user to adapt notifications to local law and regulations. Safety information describe the product with regard to safety and can not be considered technical information about the product.
