4.	Section 4: First aid measures		
4.1	Description of first aid measures		
	must be kept in mental and physical rest. Victim must be kept warm sheet with information about substance or mixture with you in case of Inhalation: Break exposure, move to fresh air protecting the victim fr breath or other symptoms persist. When on skin: Put away contaminated clothes and shoes, wash the can be used; seek doctor's advice, especially if the skin stays irritate Eye Contact: Rinse eyes with plenty of water (10 to 15 min). Keep e lenses remove them immediately. Seek medical attention. Ingestion: Do not induce vomiting! Drink at least 0.5 liters of water w Toxicology Information Centre for need of medical treatment with int SDS.	of medical examination. rom cold. Provide medical treatment esp e contaminated spot with plenty of tepid v ed. eyes open (even by force if necessary). If with 5 to 10 tablets of crushed charcoal. I	ecially if coughing, shortness of vater; if the skin is not irritated, soa the victim is wearing contact n case of nausea contact the
4.2	Most important symptoms and effects, both acute and delayed		
4.3	The product may have adverse effects through inhalation and if swa Indication of any immediate medical attention and special treatment		Symptomatic treatment
5.	Section 5: Fire-fighting measures		
5.1	Extinguishing media		
	Suitable extinguishing media: The product is not inflammable. Wate		le, dry powder.
	Unsuitable extinguishing media: The strong water current. It can be	•	
5.2	Specific danger linked to the substance or mixture: Carbon monoxid		produced while burning.
5.3	Advice for firefighters: wear a breathing apparatus and protective clo	othing.	
6.	Section 6: Accidental release measures	• • • • • •	
6.1	Personal precautions, protective equipment and emergency procedurespirator.	ures: Appropriate protective gloves, gogo	gles, appropriate clothing, or
6.1.1	For workers except for those intervening in emergency cases - instru-	uctions in case of accidental spill and lea	k of substance or mixture:
	a) use of appropriate protection (including personal protective equip clothing contamination;		avoid any skin, eyes or personal
	b) removing possible sources of ignition, providing proper ventilation		
	c) emergency measures, for example necessary evacuation from da		
6.1.2	For workers intervening in emergency cases - instructions for appro		,
6.2	Environmental precautions: Prevent environmental pollution - leakage	ge into drains, surface water, groundwate	er or soll.
6.3	Methods and materials for limitation of leaks and for cleaning:		
6.3.1	Instructions for leak limitation of spilled substance or mixture		
	a) enclose the spilled mixture, cover the canalization;		
6 2 2	b) seal the damaged package		
6.3.2	Instructions for removal of spilled substance or mixture	lianaaal	
6.4	Absorb with appropriate agent, hand over to authorized person for d Reference to other sections: See also section 7., 8 and 13.	แจมบจิสโ.	
7.	Section 7: Handling and storage		
7.1	Measures for safe manipulation:		
Ľ			

a) Workers handeling the product have to get familiar with health and safety rules for work and have to obey these rules. Secure escape routs (enclosing of leaked mixture, sealing of demaged packages and so on), for fire prevention (remove ignition sources, non-sparkling tools and so on) andlimit the production of aerosol and dust.

b) Obey measures for prevention of manipulation with incompatible substances or mixtures (see part 10) in common areas.

c) Store in original closed packages in temperature from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources.

d) Prevent the contamination of environment, i.e. leak into canalization, surface or underground water and soil.

7.1.2 Instructions for general hygiene of work:

8.1

a) Do not eat, drink or smoke on work areas.

b) After working with product wash your hands with soap and water, eventualy use regeneration hand cream.

c) Before entering dining areas, remove contaminated clothing and protective equipment.

7.2 Conditions for safe storage of substances and mixtures including incompatible substances and mixtures: Store in dry and well-ventilated storages in original closed packages in temperatures from +5 to +25 °C, do not expose to temperature under 0 °C (not even in short term). Do not expose to direct sunlight or other heat sources. Prevent any contact with oxidazing substances, strong acids and bases. Do not store with food, drinks and feed. The product is not a flamable liquid according to ČSN 65 0201.

7.3 Specific end use: see part 1.2; coating procedure and recomendations are listed in technical list of the product, or in other product documentation.

8. Section 8: Exposure controls / personal protection

1-methoxypropan-2-ol
107-98-2
375 (100 ppm)
560 (150 ppm)
Can be absorbed trough the skin. The assigned substances are those for which there are concerns that dermal absorption will lead to systemic toxicity.

1-Methoxypropan-2-ol (ES: 203-539-1):

DNEL (Workers, Hazard via inhalation route, Systemic effects, Long term exposure)	369 mg/m ³
DNEL (Workers, Hazard via inhalation route, Systemic effects, Acute/short term exposure)	553,5 mg/m ³
DNEL (Workers, Hazard via inhalation route, Local effects, Acute/short term exposure)	553,5 mg/m ³
DNEL (Workers, Hazard via dermal route, Systemic effects, Long term exposure)	183 mg/kg bw/day
NOAEL (Workers, Hazard via dermal route, Systemic effects, Long term exposure)	1840 mg/kg bw/day
DNEL (General Population, Hazard via inhalation route, Systemic effects, Long term exposure)	43,9 mg/m ³
DNEL (General Population, Hazard via dermal route, Systemic effects, Long term exposure)	78 mg/kg bw/day
NOAEL (General Population, Hazard via dermal route, Systemic effects, Long term exposure)	1840 mg/kg bw/day
DNEL (General Population, Hazard via oral route, Systemic effects, Long term exposure)	33 mg/kg bw/day
NOAEL (General Population, Hazard via oral route, Systemic effects, Long term exposure)	919 mg/kg bw/day
PNEC aqua (freshwater)	10 mg/L
PNEC aqua (marine water)	1 mg/L
PNEC STP	100 mg/L
PNEC sediment (freshwater)	52,3 mg/kg sediment dw
PNEC sediment (marine water)	5,2 mg/kg sediment dw
PNEC soil	4,59 mg/kg soil dw

8.2 Exposure controls

Ensure adequate ventilation. Ensure protective equipment is worn while working with the product. Contaminated work clothes can be reused after thorough cleaning. Wash your hands and face with soap and water after use. Do not eat, drink or smoke while working with the product.

8.2.1 Appropriate engineering controls: Observe the usual precautions to protect the health and well-ventilated.

8.2.2 Individual protection measures, such as personal protective equipment:

Occupational exposure is governed by Directive 89/686/EEC therefore any use of personal protective equipment must be in accordance with this Regulation.

a) Eyes and face protection: Suitable safety goggles (EN 166), face shiled.

b) Skin protection: Common safety clothing with long sleave and shoes; take of the contaminated clothing and wash your skin with soap and water.

b-1) Hands protection: suitable protective gloves (made from rubber - according to EN 374), wash your hands with soap and water after work, c) Airways protection: with proper area ventilation not required. When spraying, face half-shiled is recommended for gass filtration (EN 405) or quarter-shiled with gass filter (EN 140, EN 141).

d) Heat hazard: Special attention must be paid to construction of personal protective measures, when specifying protective measures for protection against materials, which are considered to be heat hazard. Not relevant for this product.

8.2.3 Environmental exposure controls: Avoid infiltration of surface and groundwater and soil.

9.	Section 9: Physical and chemical properties		
9.1.	Information on basic physical and chemical properties		
	a) State	low viscosity liquid	
	b) Color	milky white liquid	
	c) Odour:	characteristic	
	Odor threshold:	Not specified	
	d) Melting/Freezing point (temperature range) (°C):	approximately 0	
	e) Boiling point or initial boiling point and boiling range (°C)	approximately 100	
	f) Combustibility:	non-flammable liquid	
	g) Explosion limints: upper limit (% volume):	Not specified	
	lower limit (% volume):	Not specified	
	h) Point of ignition:	Not specified	
	i) Temperature of self-ignition:	Not specified	
	j) Temperature of decomposition (°C):	Not specified approximately 8 Not specified	
	k) pH (23 °C)		
	I) Kinematic viscosity:		
	m) Solubility (23 °C)		
	- with water:	unlimited miscibility	
	- with fats:	Not specified	
	n) Partition coefficient n - octanol/water:	Not specified	
	o) Steam pressure (20 °C):	Not specified	
	p) Density and/or relative density (20 °C):	approximately 1,10 g.cm ⁻³	
	q) Relative viscosity of steam (at °C):	Not specified	
	r) Particles characteristics:	Not specified	
9.2	Other information:		
9.2.1	Information about class of physical hazard:	is not relevant	
9.2.2	Other safety characteristics		
	Evaporation rate:	Not specified	
	Dynamic viscosity:	Not specified	
	Explosive properties:	Not specified	
	Oxidizing properties:	Not specified	
	VOC (Mixture A + B)	63 g/L	
10.	Section 10: Stability and reactivity		
	Product is stable under recommended storage and handling condition		
10.1	Reactivity: Product is not reactive under recommended storage an	d handling conditions.	
10.2	Chemical stability: Product is stable under recommended storage a	and handling conditions.	
10.3	Possibility of hazardous reactions: In case of contact with substance	ces reacting dangerously with water.	
10.4	Conditions to avoid: Temperatures below 0 °C and above 100 °C c temperature reduce life of the product.	cause degradation of the product. Temperatures above recommended stora	
10.5	Incompatible materials: Substances reacting with water, strong aci	ds and bases, oxidizing agents, uncontrolled contact with amines.	
10.6	Hazardous Decomposition Products: Carbon monoxide and dioxide	e, hydrogen chloride may form during burning.	
11.	Section 11: Toxicological information		
11.1	Information about hazard classes acording to (ES) č. 1272/2008		
	a) acute toxicity:	the classification cirteria are not met based on avilable information	

- LD₅₀, oral, rat (mg.kg⁻¹):

- LD₅₀, dermal, rat or rabbit (mg.kg⁻¹):
- LC₅₀, inhalation, rat, for aerosols or particles (mg.kg⁻¹):
- LC₅₀, inhalation, rat, for gases and vapours (mg.kg⁻¹):

b) corrosivity/skin irritation:

c) serious eye damage / eyes irritation:

d) sensitivity of airways / sensitivity of skin:

e) germ cells mutagenicity:

the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information the classification cirteria are not met based on avilable information

1	g) toxicity for reproduction:	the classification cirteria are not met based on avilable information
	h) toxicity for specific organs - single exposure:	the classification cirteria are not met based on avilable information
	i) toxicity for specific organs - multiple exposures:	the classification cirteria are not met based on avilable information
	j) hazards while inhaled:	the classification cirteria are not met based on avilable information
	Human experience:	No detrimental effects were found upon compliance with the
		prescribed safety measures.
	Tests on animals:	Were not performed
	Information for each hazard class or breakdown:	see above
11.1.2	Toxicological properties of mixture	not avilable
	1-Methoxypropan-2-ol (ES: 203-539-1)	see part 8
11.1.3	If enough information from substance/mixture trials exist, it might be necessary to sum up results of used studies, for example according to exposure run	not relevant
11.1.4	If the classification criteria are not met for specific hazard class, information explaining the justification should be stated.	relevant concentration limits were not exceeded
11.1.5	Information about likely exposure run	no effects on human health are known
11.1.6	Symptoms corresponding to physical, chemical and toxicological features	no effects on human health are known
11.1.7	Belated and immediate effects and chronical effects of short/long term	no effects on human health are known
11 1 0	exposure Interactive effects	unknown
	Lack of specific data (Mixtures	not relevant
	Mixtures Mixtures information compared to substance information	see part 8
11.1.1		nd can cause different levels of absorption, metabolism and assertion
	1) Substances in the mixture can react with each other inside of a body al	
	2) It is necessary to consider, if concentration of each substance is suffici	
	a) if the information are doubled, they are listed only once for a substance as a whole, for example when two different substances are	Not relevant for this mixture.
	causing vomiting and diarrhea;	Not relevant for this mixture
	b) if it is not likely the effects will appear with current concentrations, for example when weak irritating substance is disolved in non-irritating solution to a level under certain concentration;	Not relevant for this mixture.
	c) if the information about mutual effects of substances in the mixture are unavilable, no assumptions will be listed and instead effects on healtf of each substance will be listed.	see part 8
11.1.1	Cother information	None
11.2	Other hazards information	
	Features causing disruption of endocrinal systém	Not relevant for this mixture.
	Additional data:	None
12.	Section 12: Ecological information	
12.1	Toxicity	
	Acute toxicity for water organisms:	
	- LC ₅₀ , 96 hours, fish (mg/kg):	Not set
	- LC ₅₀ , 48 hours, fish (mg/kg):	Not set
	- IC ₅₀ , 72 hours, algae (mg/kg):	Not set
12.2	Persistence and degradability:	Not set
12.3	Bioaccumulative potential:	Not set
12.4	Mobility in soil:	It was not determined, the blend is miscible with water.
12.5	Results of PBT and vPvB	The mixture does not meet the criteria for classification as PBT or vPvB.
12.6	Features causing disruption of endocrinal systém	Unknown for this mixture
12.7	Other adverse effects:	See Section 2
	Additional data:	None
13.	Section 13: Disposal considerations	
13.1	Methods of waste management:	
10.1	a) Appropriate methods of substance, mixture and contaminated packagin	ng disposal: Product rempants and packaging with product rempants
	must be incinerated in a hazardous waste incinerator or kept at a hazardo	
	b) Physical / chemical properties that can affect means of waste handling	
	water, after mixing and curing these behave as solid.	
	c) Avoidance of disposal through sewer: It is necessary to prevent leakag	e of both components and hardened mixture into drains.
	d) Special precautions for the recommended waste management: Avoid of	contact with skin and eyes.

c) important references to literature and data sources Initial data sources are safety data sheets of the inherent (components).

d) in case of mixture, statement about evaluation method used for classification according to article 9 of directive (ES) number 1272/2008

For evaluation purposes, principles of extrapolation were used. Calculation methods.

e) List of H-sentences, whose full form is not listed in other parts.

H226 Flammable liquid and vapour.

H336 May cause drowsiness or dizziness.

Guidelines for training:

As required by national legislation.

Recommended restrictions on use (i. e. non-statutory recommendations by supplier):

Product should not be used for other purposes than specified (see section 1.2). Because specific conditions of use are beyond supplier's control it is responsibility of the user to adapt notifications to local law and regulations. Safety information describe the product with regard to safety and can not be considered technical information about the product.
